Summary

As a software developer, I am highly motivated to contribute to team success through my skills in programming languages and libraries, attention to detail, and exceptional organizational abilities. With a passion for learning, I am dedicated to continuous growth and improvement in the rapidly evolving software development ecosystem. My enthusiasm for developing innovative solutions matches my commitment to excellence and strong work ethic. I look forward to utilizing my skills and knowledge to make valuable contributions to any team I am a part of.

Technical Skills

- Node.js (express)
- Nest.js
- Java(core-api)
- React.js (Tailwind-CSS, Antdesign, Styled-components)
- Next.js
- Javascript
- Redux (Tunk)
- Redux Tool Kit(RTK)
- React query
- React-hooks
- Mongo-Db
- Mysql
- PostgreSQL
- Git
- Docker (containerization)
- Linux
- Jenkins
- Gitlab-ci
- Github Actions
- Figma (Design)

Education

BSC
Addis Ababa Science And Technology
University
Software Engineering.
2017-2021 G.C

Experience (3+ Years)

Pixel - Backend-Developer (1 year)

- Led the development of a comprehensive CRM system for the product line and to streamline customer interactions and enhance user experience.
- Designed and implemented an intuitive Dashboard for real-time inventory control, enabling efficient stock monitoring, order processing, and demand forecasting.
- Architected a robust SQL database to manage inventory and customer data, optimizing query performance and ensuring data integrity.

ResMax Global Technologies - FullStack-Developer (1 year)

- Participated the end-to-end development of a robust Fleet Management System for a governmental office, optimizing vehicle utilization, tracking, and maintenance.
- Designed and implemented a Visitor Tracking System to enhance security protocols and streamline visitor management processes.
- Created and launched a range of customer-facing products, contributing to enhanced user engagement and satisfaction.

IcogACC, - Fullstack-Developer (1+ year)

- Successfully developed and deployed diverse systems catering to the unique requirements of the company's various projects, leveraging to ensure optimal functionality and user experience.
- Took on the role of lead developer for a significant large-scale project, guiding the development process from inception to delivery. Collaborated with a skilled team of developers to achieve project milestones and meet client expectations.
- Designed and executed cutting-edge web applications, demonstrating expertise in both frontend and backend development. Led a dedicated team in crafting user-centric solutions, ensuring seamless integration and cohesive user interfaces.
- Managed the end-to-end deployment and maintenance of services on DigitalOcean, employing best practices in server setup, configuration, and security to guarantee uninterrupted service availability.
